

To Whom It May Concern,

I am pleased to strongly recommend Milind Srivastava, who has been working with my team at [ByteEdu](#), Jaipur for three months. During this period, Milind has made a significant impact through his work, showcasing both technical proficiency and a keen understanding of real-world applications.

Milind contributed meaningfully to the Seeksha Saathi project, a comprehensive learning platform developed at ByteEdu under the leadership of Founder Manan Chawla. He was involved in key frontend and backend development tasks, and played an active role in the deployment process across UAT and Production environments, aligning his work with modern DevOps practices.

In addition to his development skills, Milind also delivered insightful research on Machine Learning algorithms, supporting the team in integrating intelligent features into the platform. His background in Operational Engineering gives him a structured, systems-level approach to problem-solving, which complements his quick learning ability and strong collaborative mindset.

We look forward to involving Milind in more complex and cross-functional projects, given his demonstrated potential and positive work ethic. I am confident he will be a strong asset to any future team or organization, particularly in roles that demand a balance of technical depth and strategic thinking.

Sincerely,
Nihalika Kumari
